

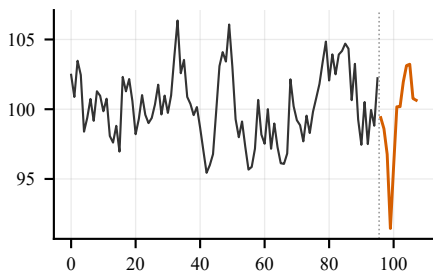

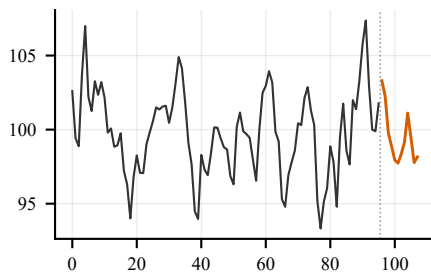

Figure 1: One realisation of each data-generating process ($n = 96$; held-out horizon in colour)

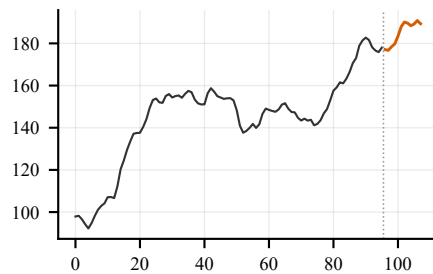

D1: AR(1)

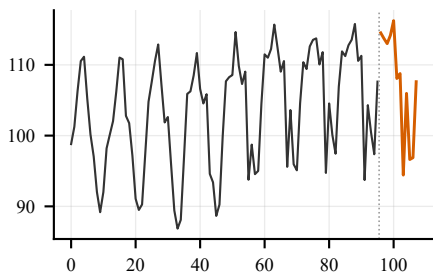

D2: ARMA(1,1)

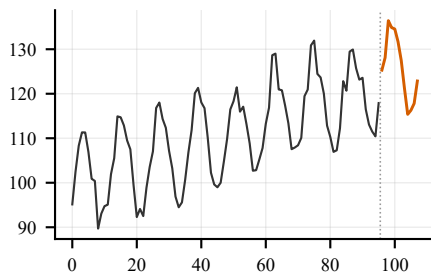

D3: ARIMA(1,1,1) with drift

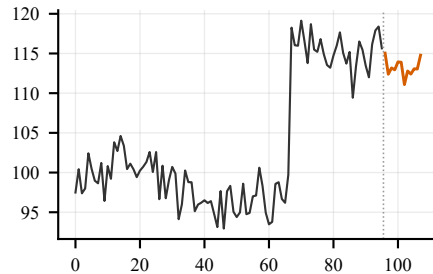

D4: SARIMA(1,0,0)(1,1,0)[12]

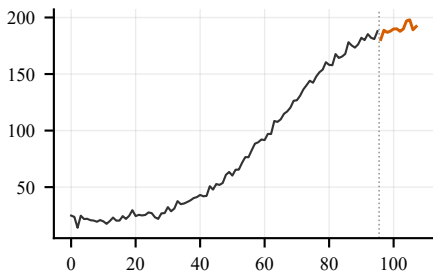

D5: ETS(A,A,A)

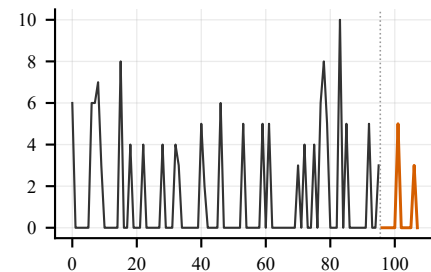

D6: Local level with structural break

D7: Logistic growth

D8: Intermittent demand

D9: AR(1) with GARCH(1,1) errors
